

TPS Filling & Discharge Equipment

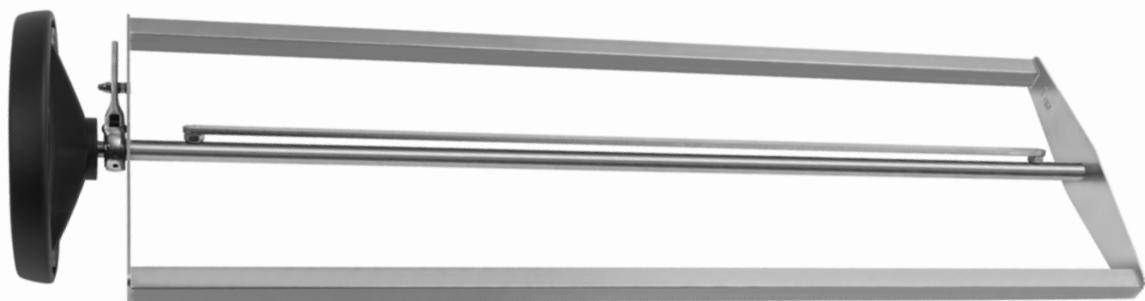

TPS Tilter

The **TPS TILTER** is designed for the discharge of viscous products. The container is loaded to the platform and with the use of the over centre cam system the container can be tilted by just pulling the handle, even when the container is full of product.

TPS Ratchet Wringer

The **TPS Ratchet Wringer** has been designed to help with the discharge of all liquid products with simple and easy operation. Just connect the liner when full and, as the container empties, wind the handle to keep the bag taut. Thus allowing all of the product to move towards the discharge outlet for total emptying of the container.
